

Quality, environmental, occupational safety and health policies and objectives

Strategic tasks:

- › Create value-added by providing timely and reliably quality air handling units that meet customer needs.
- › Work in a socially responsible manner, in constant communication with the employees. Listening to and understanding them must ensure that employees have attractive and safe working conditions.
- › Use natural and energy resources efficiently and economically in our activities.
- › Conduct continuous improvement and innovation based on efficient business processes in line with our partners' processes and expectations and ensure reliable risk management.
- › Continuously evaluate performance by analyzing the metrics and indicators of ours and our partners' value-creating processes that are critical to ensuring reliability, quality and required capability.

Goals:

- › Deliver on time. Parameter - Reliability (OT - On Time), value - 99%.
- › Deliver exactly what the customer ordered. Parameter - Capacity (IF - In Full), value - 99%.
- › Delivering quality products, exactly according to agreed specifications and regulatory documents. Parameter - quality, value - 100%.

The management of the company commits:

- › Introduce the quality policy to the company's employees so that it can be understood and implemented.
- › Systematically review and evaluate quality policies and objectives to ensure they remain relevant.
- › Conform to applicable requirements and continuously improve the quality management system by providing the necessary resources.
- › To create conditions for continuous improvement of the employees, to encourage them to achieve higher results in the implementation of quality policy objectives.
